TOpenVoiceFile

Description

Opens the voice file that is specified by the parameter `file_name` on behalf of the telephony object specified by the parameter `dn` and that has earlier logged in to a mailbox using the function `TLoginMailBox()`.

`TOpenVoiceFile()` returns a file handle upon generation of `TEventVoiceFileOpen`.

Parameters

Name	Description
server	Local server handle to the T-Server in question.
dn	Directory number of the telephony object on whose behalf the file is requested to be opened.
file_name	A pointer to the name of the file that is requested to be opened.
reasons	A pointer to a data structure that provides additional information associated with this action.
extensions	A pointer to an additional data structure.

Return Values

Standard (standard-return-values.)
