# TClearCall

## Description

Deletes all parties, that is, all telephony objects, from the call specified by `conn_id` and disconnects the call.

## Parameters

Name	Description
<code>server</code>	Local server handle to the T-Server in question.
<code>dn</code>	Directory number of the telephony object that is requested to be released from the call.
<code>conn_id</code>	Connection identifier of the call, from which the telephony object in question is requested to be released.
<code>reasons</code>	A pointer to a data structure that provides additional information associated with this action.
<code>extensions</code>	A pointer to an additional data structure.

## Return Values

Standard (See [standard-return-values](#).)
