TKVListAddInt

Description

Adds one data item of integer type, specified as the parameters `key` and `value`, to the data structure specified by the parameter `list`.

Syntax

```
TKVResult TKVListAddInt(  
    TKVList *list,  
    char *key,  
    int value  
);
```

Parameters

For basic type information for each parameter, consult the Syntax section, above.

Name	Description
<code>list</code>	A pointer to the data structure to which the specified key-value pair should be added.
<code>key</code>	A pointer to the string representing the parameter name.
<code>value</code>	The value of the key-value pair specified by the parameter <code>key</code> .

Return Values

Refer to the type [TKVResult](#).
