TKVListDeletePair

Description

Deletes one data item, specified by the parameter `key`, from the data structure specified by the parameter `list`.

Syntax

```
TKVResult TKVListDeletePair(  
    TKVList *list,  
    char *key  
);
```

Parameters

For basic type information for each parameter, consult the Syntax section, above.

Name	Description
<code>list</code>	A pointer to the data structure from which the specified key-value pair should be deleted.
<code>key</code>	A pointer to the key of the key-value pair that should be deleted.

Return Values

Refer to the type `TKVResult`.

Comments
