# TListenReconnect

## Description

On an existing conference call, cancels Deaf mode for the party defined by the parameter `listener_dn`.

## Parameters

Name	Description
<code>server</code>	Local server handle to the T-Server in question.
<code>dn</code>	Directory number of the telephony object on whose behalf this request is made; must be a party in the specified call.
<code>listener_dn</code>	Directory number of the telephony object for which Deaf mode should be canceled.
<code>conn_id</code>	Connection identifier of the call that the telephony object in question is requested to be connected to after Deaf mode is canceled.
<code>reasons</code>	A pointer to a data structure that provides additional information associated with this action.
<code>extensions</code>	A pointer to an additional data structure.

## Return Values

Standard (See [standard-return-values](#).)
