TSendDTMF

Description

On behalf of the telephony object specified by the parameter `dn`, sends digits that are expected by an interactive voice response system.

Parameters

Name	Description
<code>server</code>	Local server handle to the T-Server in question.
<code>dn</code>	Directory number of the telephony object on whose behalf the digits are requested to be sent.
<code>conn_id</code>	Connection identifier of the call in question.
<code>digits</code>	A pointer to the digits that should be sent.
<code>reasons</code>	A pointer to a data structure that provides additional information associated with this action.
<code>extensions</code>	A pointer to an additional data structure.

Return Values

Standard (standard-return-values.)
