Configuration Layer Objects Reference Guide

CfgDeltaPlaceGroup

5/6/2025

CfgDeltaPlaceGroup

Description

The changes to make to a CfgPlaceGroup object.

Attributes

- deltaGroupInfo — A pointer to the structure containing information about changes made to this group data. Mandatory.

- deletedPlaceDBIDs — A pointer to the list of identifiers of the places deleted from this group.

- addedPlaceDBIDs — A pointer to the list of identifiers of the places added to this group.

> ### Tip
> Configuration Server does not place any restrictions regarding the types of DNs in the places that are added to a group.
