TEventGetConnID

Description

Returns the connection ID value of the attribute specified by the parameter `attr` (or the value `NO_CONN_ID` if this attribute is not present in `TEvent`).

Parameters

Name	Description
<code>ev</code>	A pointer to the event data structure from which the connection ID is returned.
<code>attr</code>	The attribute for which the connection ID is sought.

Return Values

The function returns a value of `TConnectionID` type.
