TRetrieveCall

Description

Connects the held call specified by the parameter `conn_id` to the telephony object specified by the parameter `dn`.

Parameters

Name	Description
<code>server</code>	Local server handle to the T-Server in question.
<code>dn</code>	Directory number of the telephony object to which the held call is requested to be connected.
<code>conn_id</code>	Connection identifier of the held call.
<code>reasons</code>	A pointer to a data structure that provides additional information associated with this action.
<code>extensions</code>	A pointer to an additional data structure.

Return Values

Standard (See [standard-return-values](#).)
