Contents

- **1 8.5.101.29**
 - **1.1 Helpful Links**
 - **1.2 What's New**
 - **1.3 Resolved Issues**
 - **1.4 Upgrade Notes**
 - **1.5 Supported Languages**

What's New

This release contains the following new features and enhancements:

- Configuration Server external authentication now uses OpenSSL version 1.0.2q for secure connections to LDAP Servers.
- Configuration Server now includes support for a generic **Linux** OS type when defining the host objects. To utilize this functionality, you must use Configuration Database 8.5 and upgrade to latest locale definitions as described in [Updating Configuration Definitions](#). The version of updated locale is 8.5.000.11 and is included in the Configuration Server Installation Package starting from this version.

Resolved Issues

This release contains the following resolved issues:

Configuration Server no longer terminates unexpectedly when it is started with the **-dumpauditxml** parameter. Previously, this happened only in rare cases. (MFWK-21393)

Configuration Server now uses RSA cryptosystem with key length 2048 when encrypting the configuration database password. (MFWK-21275)

This release of Configuration Server fixes the issues identified by Optiv source code analysis. (MFWK-21274)

Upgrade Notes

No special procedure is required to upgrade to release 8.5.101.29.

Supported Languages

See [Release 8.5.x Translation Support](#).
