Known Issues and Recommendations

Configuration Database Maintenance Scripts

The Known Issues and Recommendations section is a cumulative list for all 8.5.x releases of Configuration Database Maintenance Scripts. This section provides the latest information on known issues and recommendations associated with this product. It includes information on when individual items were found and, if applicable, corrected. The Resolved Issues section for each release may list additional issues that were corrected without first being documented as Known Issues.

When running upgrade scripts on an MS SQL database with SQL_Latin1_General_CP1254_CI_AS collation, starting Configuration Server results in a failure. This problem occurs because some of the column names are created in upper case when executing the upgrade scripts.

| | | |
