What's New

This release includes only resolved issues.

Resolved Issues

This release contains the following resolved issues:

GMS is now able to manage several statistic references that Statistics Server groups into a single statistic event. This scenario happens when the subscribed statistics are similar or if they share the same underlying definition but have different names. (GMS-5389)

Upgrade Notes

No special procedure is required to upgrade to release 8.5.110.11.
