## Contents

## What's New

This release contains the following new features and enhancements:

- Support for the following operating environment items. See the Genesys Mobile Services page in the *Genesys Supported Operating Environment Reference Guide* for more detailed information and a list of all supported operating systems.

    - OpenJDK 8

    - CentOS Linux 7

- Support for HTTP Strict Transport Security (HSTS).

- GMS no longer supports embedded Cassandra. Refer to the Upgrade Notes to migrate from embedded Cassandra to external Cassandra.

- In Context Services, the Composite Service Start query now supports the auto-closed and auto-complete features.

## Resolved Issues

This release contains the following resolved issues:

The **UserOriginated** scenario now correctly works with an Orchestration Server cluster. (GMS-6991)

The **_CB_EWT_WHEN_READY_TO_START_LAST_MEDIA_IXN** KVP is now correctly saved in the Database. (GMS-7065)

## Upgrade Notes

GMS no longer supports embedded Cassandra. To migrate from embedded Cassandra to external Cassandra, proceed as follows:

1. Deploy a new GMS Cluster and new GMS nodes which use external Cassandra.

2. Reroute requests to the new GMS cluster.

3. Wait for in-progress customer operations to finish in the embedded Cassandra.

4. Stop the GMS node which uses embedded Cassandra.
