What's New

This release includes only resolved issues.

Resolved Issues

This release contains the following resolved issues:

A problem with JBOSS 7.1.1 and WebSphere 8.5 deployments failing because of an invalid character in the web.xml file has been corrected. (GRS-2668)

A potential security exposure caused by an XML injection issue has been corrected. In addition, the configuration options of any applications connected to GRAT are longer logged because they might contain sensitive information. (GRS-2665)
