  - [1.4 Upgrade Notes](#)

## What's New

This release contains the following new features and enhancements:

- Advanced Disconnect Detection Protocol (ADDP) is enabled by default in this release.

## Resolved Issues

This release contains the following resolved issues:

---

A problem with delays in inserting new rules has been corrected in this release by modifications to the way salience (priority order) is generated. The problem arose previously in scenarios involving large rule packages that contained many rules. (GRS-3144)

---

A classpath error has been corrected in this release. Previously, on some platforms running Tomcat 8 or 8.5, the error made GRAT unable to initialize properly, resulting in the following error in the logs:

Database not created on startup, Replacement not found for \${grs\_db\_driver}.

(GRS-3113)

---

## Upgrade Notes

No special procedure is required to upgrade to release 8.5.303.14.
