 - 1.2 New in This Release
 - 1.3 Corrections and Modifications

New in This Release

There are no restrictions for this release. This section describes new features that were introduced in this release of Voice Platform CTI Connector.

- This release contains changes to support new functionality in Genesys Voice Platform 8.5.0.

Corrections and Modifications

This release also includes the following corrections or modifications:

CTIConnector no longer terminates unexpectedly while registering a large number of ECC variables. (GVP-20864)

CTIConnector no longer terminates in this scenario:

A reliable SIP transport is being used (TCP or TLS), and the SIP client is engaged in a client INVITE transaction.

- The SIP client receives an error response SIP message and the TCP or TLS connection is lost.
- Static IP routing or DN HA routing is enabled and multiple destinations are configured.

Previously, the SIP endpoint could terminate while attempting to send an ACK message. (GVP-20424)
