New in This Release

This is a hot fix for this product. This release does not contain new features or functionality.

Corrections and Modifications

This release also includes the following corrections or modifications:

MCP no longer terminates when attempting to perform sampling rate conversion in response to fetching errors or ASR errors. (GVP-21350)

MCP no longer terminates on the 64-bit Linux platform when it needs to re-initialize the pseudo-random number generator when SRTP is enabled. (GVP-21330)

Calls are now recorded properly after an agent completes an external consult call and retrieves the call to the customer. Previously, call recording stopped when the consult call was finished, and the rest of the customer call was not recorded. (GVP-21272)

MCP no longer terminates when an audio resource URL is incorrectly set to a directory. (GVP-21253)

MCP no longer terminates when the user specifies an invalid URL in the VoiceXML menu block. (GVP-21285)
