What's New

This release includes only resolved issues.

Resolved Issues

This release contains the following resolved issues:

When Voiceprint Call Progress Detection (CPD) is enabled with a short duration set in the **postconnecttimeout** option, MCP returns `cpd.silence` if MCP does not detect the CPD result.

Previously, MCP incorrectly sent the `cpd.preconnect_timeout` when the postconnect event arrived. (GVP-23942)
