 - 1.2 What's New
 - 1.3 Resolved Issues
 - 1.4 Upgrade Notes
 - 1.5 Supported Languages

What's New

This release includes only resolved issues.

Resolved Issues

This release contains the following resolved issues:

You can now edit IFRAME widgets successfully, even if the widget was created in an earlier release of Pulse. Previously, you could not edit IFRAME widgets created in release 8.5.102 or earlier after migration. (WBRT-8328)

You can now move Dashboard, Wallboard, and Widget templates from one folder to another. Previously, you could not move it after answering No to Do you want to replace it? (WBRT-8313)

You can now select more than one object with the same display name when you create or edit a widget. Previously, the widget wizard could become unresponsive after such a selection in Google Chrome browser. (WBRT-8265)

New widgets no longer overlap existing widgets in fullscreen mode. (WBRT-8231)

The Widget wizard no longer becomes unresponsive when the configuration contains a large number of objects (>2000) available for selection. (WBRT-7004)
