Contents

- **1 8.5.100.09**
 - 1.1 Helpful Links
 - 1.2 What's New
 - 1.3 Resolved Issues
 - 1.4 Upgrade Notes

What's New

This release contains only resolved issues.

Resolved Issues

This release contains the following resolved issue:

The **create_ca.sh** script in Genesys Security Pack now properly converts a generated CA certificate to Windows .pfx format. The converted certificate contains only the CA public key, and can be imported by Windows hosts immediately. Previously, the script did not create the certificate in .pfx format. (MFWK-17445)
