 - 1.2 What's New
 - 1.3 Resolved Issues
 - 1.4 Upgrade Notes

What's New

This release contains the following new features and enhancements:

- WFM Builder supports the new Contract constraint **Minimum consecutive working days**, which is set in the WFM Web for Supervisors interface. For more information about Contract constraints, see [Working Days section](#) in the *Workforce Management Web for Supervisors Help*.

Resolved Issues

This release contains the following resolved issues:

WFM Builder now rebuilds schedules successfully. Previously, the schedule rebuild process failed to complete. (WFM-31066)

Now, WFM evenly distributes weekends off in monthly schedules when the exact number of weekends off is specified. Previously, distribution was uneven, causing the weekend of the first week of the partial month to have a disproportionate share of days off. (WFM-30980)

WFM now correctly displays the meeting name in Warning message 1033. Previously, WFM incorrectly displayed only the first character of the meeting name in the message. (WFM-30734)

WFM now rebuilds schedules successfully and without errors. Previously, WFM unexpectedly cancelled the schedule rebuild displaying Error [4], if the previous day's schedule included Activity Sets or Task Sequences with timesteps that did not have assigned Activities. (WFM-30393)
