What's New

This release includes only resolved issues.

Resolved Issues

This release contains the following resolved issues:

The column filter search now searches for items inside the folders also. Previously, the column filter search did not search the folders properly. (GAX-11301)

GAX now works seamlessly even when the `gax-opm` plugin is disabled. Previously, there was a thread-lock situation that prevented GAX from getting started when the `gax-opm` plugin was disabled. (GAX-11262)

GAX now filters unnecessary `.gz`, `.jar`, `.zip`, and `.rar` API requests. (GAX-11260)
