Resolved Issues

This release contains the following resolved issues:

GAX now uploads installation packages successfully as expected. Previously 415 Unsupported Media Type error was thrown when trying to upload installation package. (GAX-12171)

GAX now sets the Secure flag for BAYEUX_BROWSER cookie when the application runs over HTTPS and the session_securecookies property is set to true in gax.properties.(GAX-12125)

Upgraded jQuery version to 2.2.6 in GAX. (GAX-12119)

GAX is now configured with HTTP Strict Transport Security (HSTS). (GAX-12110)

GAX now correctly updates DN options through the Manage Options interface. Previously, if a DN option was modified after updating the password option, the password option was unintentionally included in the subsequent update request. (GAX-12089)

GAX now displays all DNs associated with the Agent Group in the Origination DNs tab. (GAX-12050)

Improved performance in GAX when loading permissions for access groups. (GAX-12043)

GAX now displays an appropriate warning message when attempting to modify a port that is already in use. (GAX-11572)

GAX now saves VAG successfully without throwing a validation error. Previously, when validate_data was set in GAX application options creation or update of a VAG failed due to validation errors.(GAX-12208)

Upgrade Notes

No special procedure is required to upgrade to release 9.0.109.04.
