Genesys Rules System Rules Authoring Tool Release Notes

9.x Genesys Rules System Rules Authoring Tool is part of 9.x starting in **9.0.000.13**.

Release Date	Release Type	Restrictions	AIX	Linux	Solaris	Windows
11/22/19	Hot Fix			X		X

What's New

This release contains the following new features and enhancements:

- Test Scenario Support—Parameters can now be associated with **Fact** fields to enable test scenario support in GRAT. Previously, these associations could only be set using the legacy Eclipse-based GRDT. In this release, they can now be made in the Template Development section of GRAT. (GRS-3491)

Resolved Issues

This release contains the following resolved issues:

For Decision Tables and Test Scenarios, GRAT now maintains the horizontal and vertical scroll positions correctly after a value is updated in a Condition or Action. (GRS-3497)

Clear and **Today** buttons have been added to the Decision Table popup calendar to, respectively, either clear the calendar entry or set the date to the current day. This resolves a previous problem with resetting a previously set date to an empty value. (GRS-3495)

Rule validation has been modified to check the type of rule selected rather than inheriting the type of the previously validated rule. (GRS-3488)

Changes to rule package business names that involve removal of the final character or word of the business name are now saved correctly. Previously, this action generated a Business name already exists error, and was not saved. (GRS-3483)

Sorting of templates by Date Modified now works as expected. Previously, sort order was incorrect. (GRS-3481)

Jackson library updates have been implemented to improve security. (GRS-3443)

Upgrade Notes

No special procedure is required to upgrade to release 9.0.000.17.
