Resolved Issues

This release contains the following resolved issues:

Minor corruption or inconsistency in repository that caused the Genesys Rules Authoring Tool's (GRAT)

initialization failure is fixed now. Users are no longer required to manually add the line `<param name="onWorkspaceInconsistency" value="log"/>` in the **repository.xml** file. In addition, the default value of the **auto-fix-corruptions** options is now set as true. This will enable auto-cleanup of repository tables that are out-of-sync or corrupted. (GRS-3857)

The **Start Date** column displayed on the **Rules** tab for a **Rules Package** now correctly displays the date in the locale date format, that is, dd.mm.y. (GRS-3805)

The new parameter of type **Database** added to the **Query Type** - Single Value and List is now correctly displayed in the **Givens** and **Expectations** drop-down. (GRS-3829)

Upgrade Notes

No special procedure is required to upgrade to release 9.0.000.31.
