Widgets is platform-independent software. You can deploy the installation package on any operating system that Widgets supports.

What's New

This release includes only resolved issues.

Resolved Issues

This release contains the following resolved issues:

In Widgets, aria-labels and visible text on the buttons are now identical. Previously, they were different in some cases. (CXW-138)

URLs in WebChat messages containing special characters are now properly formatted, and display correctly as links. Previously, the URL link was invalid. (CXW-132)
