## Widgets Release Notes

### 9.x

Release Date	Release Type	Restrictions
10/06/20	Update	

Widgets is platform-independent software. You can deploy the installation package on any operating system that Widgets supports.

### What's New

This release includes only resolved issues.

### Resolved Issues

This release contains the following resolved issues:

---

During a restore, the GMS Async Chat requestNotification operation now includes userData. Previously, userData was missing. (CXW-168)

---

In the WebChat Widget, when users access the VoiceOver screen reader in iOS, unnecessary swipe stops (screen reader focus) on screen reader elements are now removed. Previously, in iOS VoiceOver, when navigating with swipe gestures, extra swipe stops existed for "Emoji picker is opened/closed" and "Type your message here" text area labels. (CXW-144)

---

In the WebChat Widget, "Type your message here" is no longer read by the screen reader (JAWS) when the input container is disabled. Previously, the label was read by the screen reader (JAWS) when navigating with arrow keys, even with the input container disabled. (CXW-141)

---

---

In the WebChat Widget, the aria label on the emoji picker is now removed. Previously, the aria label was present and deemed unnecessary. (CXW-139)

---

The jQuery plugin in Widgets is now migrated from version 3.4.1 to 3.5.1, which relates to security vulnerabilities in version 3.4.1. (CXW-115)

---

## Upgrade Notes

No special procedure is required to upgrade to release 9.0.017.09.
