Widgets Release Notes

9.x

Release Date	Release Type	Restrictions
06/04/21	Update	

Widgets is platform-independent software. You can deploy the installation package on any operating system that Widgets supports.

What's New

This release includes only resolved issues.

Resolved Issues

This release contains the following resolved issues:

In the WebChat registration form, in mobile or full-screen mode, tabbing from each input field or button now works as expected. Previously, if the tab keys were used to navigate through the form, the tabbing would stop on the hidden emoji button. (CXW-253)

In the Sidebar Widget's menu items, the **role** and **title** attributes are now removed for **cx-icon** as per the Web Content Accessibility Guidelines (WCAG) standards. Previously, the **cx-icon** div tag had **role="img"** and **title** attributes, which resulted in missing alt text. (CXW-247)
