9.x

Release Date	Release Type	Restrictions
08/03/21	Update	

Widgets is platform-independent software. You can deploy the installation package on any operating system that Widgets supports.

What's New

This release includes only resolved issues.

Resolved Issues

This release contains the following resolved issues:

In WebChat, when sending markdown messages that contain URLs with query parameters, the HTML target attribute is now properly added to the chat transcript. Previously, the target attribute provided by the user in the markdown URL message was not applied to the HTML link tag, which caused the URL in the chat transcript to not function as expected. (CXW-262)
