SIP Endpoint SDK for .NET Release Notes

Release Date	Release Type	Restrictions	AIX	Linux	Solaris	Windows
02/28/19	General					X

What's New

This release includes only resolved issues.

Resolved Issues

This release contains the following resolved issues:

Audio device support is improved to avoid a full device restart during the call by delaying the device release for a short interval. This eliminates potential service delays when stopping or restarting the audio device takes longer than usual. (SEPSDK-2358)

Memory handling issues that resulted in a corrupted User-Agent header are fixed. (SEPSDK-2330)
