SIP Endpoint SDK for .NET Release Notes

9.x

Release Date	Release Type	Restrictions	AIX	Linux	Mac	Solaris	Windows
03/28/24	General						X

What's New

This release contains the following new features and enhancements:

- Starting from this release, SIP Endpoint SDK is now built using Visual Studio C++ 2019 as the Visual Studio C++ 2013 compiler has reached end of life and Microsoft no longer supports VC++ Redistributable 2013. Using SDK now requires installation of the [latest VC++ redistributable](#). (SEPSDK-3017)
- SIP Endpoint SDK is now only available as a 64-bit build and the 32-bit SDK is deprecated and no longer available. (SEPSDK-3017)

Resolved Issues

This release contains the following resolved issues:

TLSv1.3 is now supported in SDK-based applications running on Windows 11 and Windows Server 2022. (SEPSDK-3041)

Upgrade Notes

No special procedure is required to upgrade to release 9.0.100.03.
