- **1 8.5.108.03**
 - 1.1 Helpful Links
 - 1.2 What's New
 - 1.3 Resolved Issues
 - 1.4 Upgrade Notes

What's New

This release contains the following new features and enhancements:

- Chat Server now supports push notifications about session activity via flex protocol, which is required by GMS for CometD support.
- Chat Server now provides the ability to send a direct message in a chat conference and/or coaching mode. For example, in a conference with 3 agents, an agent can send a direct message to another agent, and this message will not be visible to the third agent.

Resolved Issues

This release contains the following resolved issues:

Chat Server now correctly processes the closing of chat sessions when an ESP message is received during a chat session closure. Previously, in certain environments, chat interactions might get stuck looping after upgrading to chat server 8.5.x from 8.1.x. (ESR-12822)
