 - 1.2 What's New
 - 1.3 Resolved Issues
 - 1.4 Upgrade Notes

What's New

This release includes only resolved issues.

Resolved Issues

This release contains the following correction or modification:

SNMP master agent no longer terminates unexpectedly if junk data is received on the port using the AgentX++ protocol. Previously, when an unknown protocol-based component, such as a port scanner or HTTP, is connected to the SNMP master agent on the AgentX++ port, the SNMP master agent sometimes stopped unexpectedly. To prevent this from happening in earlier releases, do not connect any other protocol-based components to the AgentX++ port of SNMP master agent. (MFWK-18351)

Upgrade Notes

No special procedure is required to upgrade to release 8.5.100.08.
