# Stat Server User's Guide

Java Category

# Java Category

The JavaCategory statistical category must be specified in a stat type's definition to use statistical definitions residing in a Stat Server Java Extension (SSJE). When loaded, each SSJE passes its own statistical definitions to Stat Server availing them to Stat Server clients. These stat types can be real-time or historical and, unlike regular stat types, are dynamic in nature. This means that they are enabled only if the corresponding SSJE is loaded.

The *Solution Reporting Templates* book of the *Reporting Technical Reference* series describes stat types provided in the 7.x and 8.x releases of the Outbound Contact (OCC) and Multimedia (MCR) SSJEs. See [Reporting and Reporting Templates](#).

Starting with release 8.5.1, Stat Server is extended to include support for the Orchestration Server (ORS) Java Extension.

<b>Disclaimer:</b>	SSJE is a closed platform for Genesys use only. No third party Stat Server Java Extensions are supported by Genesys.
