# Stat Server User's Guide

Statistic Configuration Options

5/8/2025

# Statistic Configuration Options

In the Genesys Statistical Model, you configure the metrics that Stat Server should collect for its clients within the Stat Server application itself on the **Options** tab. This chapter describes those options. To learn about the options that you can use to configure other aspects of the Stat Server application apart from metric definitions, refer to the [RTME Options Reference](#).

A metric is defined by the values of configuration options, which are described in the following sections:

- [TimeProfiles Section](#)
- [Filters Section](#)
- [TimeRanges Section](#)
- [Statistical Type Sections](#)

The Genesys Statistical Model is described in the **Overview** book of the *Reporting Technical Reference* series on the [Reporting Landing Page](#).
