SIP Server Deployment Guide

Enhanced Reporting for Early ISCC Transaction Completion

5/13/2025

Enhanced Reporting for Early ISCC Transaction Completion

Starting with release 8.1.102.09, SIP Server supports the new **transaction-state** configuration option in the **[extrouter]** section. This option enables improved historical reporting of data for multisite scenarios where a call is successfully delivered to the destination site but is not answered by the target agent. See the TSCP Release Note version **8.1.010.77** for details.
