GENESYS™

Integration Reference Manual

F5 Networks BIG-IP LTM

4/2/2025

F5 Networks BIG-IP LTM

This document describes how to integrate SIP Server with the F5 Networks BIG-IP Local Traffic Manager (hereafter referred to as *BIG-IP LTM*) to support SIP Server hot `standby` high-availability (HA) mode. It contains the following sections:

- Overview
- Configuring SIP Server HA
- Configuring BIG-IP LTM
- Configuring TLS
- Deployment Architecture Example

Note: The instructions in this document assume that BIG-IP LTM is fully functional. They also assume that Genesys SIP Server has already been installed and configured to function properly.
