**\* The above Nuance versions are what were used during testing against a specific GVP release. However, the certified version and any later Service Pack are supported. For example, if Nuance Recognizer 10.2.x was certified against GVP 8.1.5, then Genesys also supports Nuance Recognizer 10.2.y on GVP 8.1.5 and higher.**

**\*\* Genesys announced the end of life (EOL) for these products on May 27, 2016. Please contact your Account Executive, Partner Manager, or the GVP Product Manager, for information about migration, entitlement, and/or product availability.**

**\*\*\* All Recognizer 10.x Languages are compatible with Recognizer 11 (Tiers 2 - 4), and Vocalizer 6 voices are compatible with Vocalizer 7; however, Speech Suite 11 requires a fresh installation and a new license file. For additional information about Nuance Speech Suite 11, please consult the Nuance Release Notes and Speech Suite documentation available with the Nuance software. For a replacement license files, please contact your Nuance support provider.**

## General Note

- The data in the above table was consolidated to the major releases of GVP, showing differences in the minor releases of GVP only whenever there are changes with the validation of the underlying supported Nuance products.
