# Genesys Supported Media Interfaces Guide

Welcome to the online release of the Genesys Supported Media Interfaces guide.

## Purpose

This manual provides system-level information for the supported media interfaces for Genesys releases. The information includes switches, trunks, media gateways, endpoints, soft and hard phones, dialogic boards and more. This manual is continually updated when new Genesys products are released or new products emerge that Genesys products support.

## Audience

This manual is primarily intended for system engineers and other members of an implementation team who set up and maintain Genesys products. This document assumes that you have a basic understanding of:

- Computer-telephony integration (CTI) concepts, processes, terminology, and applications.
- Network design and operation.
- Your own network configurations.

You should also be familiar with Genesys Framework architecture and functions.

## Guidelines for Using This Document

- Genesys Customer Care and product teams fully support integrations to the devices and SIP trunks listed in these tables. Expectations of this support are as follows:
  - Each integration has been successfully tested, either directly by Genesys or in co-operation with a partner.
  - Support focuses on the integration aspects including the SIP signaling and media (RTP).
  - Support does not extend to troubleshooting the 3rd party component itself.
  - Support is extended across an entire Product Line which shares common software or firmware.
  - Support is typically extended across a range of releases based on a single test. For example, **4.x** typically indicates that version 4.0 was tested, and support is extended to any release that starts with the major version **4**, such as **4.0.3**, **4.1**, and so on. This policy is based on practical experience of excellent backward compatibility by both Genesys and our partners.

- Support is based on an end-to-end view of a deployment; Genesys requires that devices or trunks connected via an SBC must also be supported (the SBC does not provide complete isolation).
- Genesys Customer Care and product teams do recommend specific products from our top partners. These offer an added benefit of joint troubleshooting or co-ordinated feature development when required. These products are marked as Recommended within the tables.
- Entries are typically removed from the SMI when a product or software version reaches End of Support.

## SIP-related guidelines

- Deployments with SIP Server and/or Media Server/GVP require a Field Validation if they include devices or trunks not listed in these tables, or if the configuration is substantially different from standard practices defined in Genesys reference architectures/configurations. Please consult with Genesys Product Management if there are any questions.
- Genesys recommends devices from specific vendors in our **SIP Select** program. These devices offer enhanced feature functionality, frequent proactive integration testing, and joint collaboration between Genesys and these partners.
- Application notes are publicly available for many of the device integrations. Other white papers or application notes may be available upon request. Please contact Genesys SIP Product Management for more details.

# Definitions

## Support

Support means the software can run “on top of” or “in conjunction with” the specified media component (such as the switch, IVR, and others), and Genesys Customer Care provides answers to questions and problems, assuming the appropriate Maintenance Agreement is in effect. This support does NOT indicate a commitment to support any particular features of that media component (such as the switch). The tables in this manual are based on the vendors’ compatibility statements. Genesys may require customers to upgrade to a particular version level, operating system, or database. Unless specified, all versions between the minimum version and the latest version are supported. In the tables in this manual:

- ‘-’ indicates not applicable.
- ‘No’ indicates that support currently does not exist.
- ‘HA Warm’ refers to the support of Redundancy/Warm Standby service.
- ‘HA CTI’ refers to the support of High Availability CTI (alias Hot Standby) service. Genesys provides support for those applications specifically mentioned in this document. For other applications or solutions that are not mentioned, please consult the Genesys Product Manager for that application or solution.

**Version support for Genesys products:** Genesys solutions using specific operating systems and databases are made Generally Available (GA) within a given release of the suite. Version support “6.1+”, for example, indicates that the Genesys solution or component is available in all Genesys 6 releases from Genesys 6.1 and higher; up to and including the latest available release. Support for “6.1” without the “+” sign means support for 6.1 only.

**Version support for platforms (OS, DBMS, browsers):** This document identifies vendor product versions as “x.y,” or in some cases, “x.y.z.” Although vendors often produce “dot releases,” this document identifies only major release numbers. Genesys supports the minor releases based on the vendor’s compatibility policy.

## Controlled

Genesys provides controlled support for eligible customer configurations. Genesys Professional Services can perform on site assessment, testing, and validation of your configuration to determine eligibility. For more information, consult your Genesys Account Manager.

## Tiered Support

Genesys enforces a two-tier support policy for operating systems and databases, and gives priority to

the support of major environments. Tier 1 environments include market dominant operating systems and databases, and operating systems and databases whose vendors have accepted to sign a joint development agreement with Genesys. As a consequence, in case of a new release of the Genesys suite, Genesys may provide support for Tier 2 operating systems and databases at a later stage. Genesys provides the list of operating systems and databases supported as part of the release announcement, and then discloses plans for supporting additional platforms at a later stage. This document reflects the actual support at the time it is published.

## Maintenance Operable Components

The following core components are included into Framework components:

- T-Server
- Database Server
- Management Layer
- Stat Server

These components are backward-compatible between releases. The latest release of these interoperable components can be used as a maintenance release for previous releases. These components are known as maintenance interoperable components.

## Restrictions

The information contained in this document is provided for summary-at-a-glance purposes. Restrictions and prerequisites may apply as per product release notes. Although reasonable effort is made to ensure that the information in this document is complete and accurate at the time of release, Genesys Telecommunications Laboratories, Inc. cannot assume responsibility for any existing errors. The changes and/or corrections to the information contained in this document may be incorporated in future versions.

# Switch Support

## Read This First

- For a list of switches for which support was recently discontinued, see the Discontinued Switch Support section at the bottom of the page.
- If a switch release is not shown in this table, Genesys does not support it.
- Information on supported hardware and third-party software required to run Genesys applications is available in the Genesys Supported Operating Environment Reference Guide Wiki.
- We upgrade the switch to the latest switch version and test it with the latest GA version of T-Server.
- We upgrade the switch to the latest link version and test it with the latest GA version of T-Server.
- We announce the support based on the latest switch version. Customers may choose the latest link version or older link versions. Any compatibility issues discovered between the latest switch version and link version needs to be addressed to the switch vendor.
- The latest GA version of T-Server will then support all previous versions of the switch in compatibility mode.
- If you need to upgrade the switch version, the latest GA version of T-Server must be used together with any previous Genesys suite versions. The only Genesys migration activity needed is a T-Server upgrade.
- We recommend that you upgrade the PBX version first, and the T-Server second. If you do not plan to upgrade the PBX, there is no clear need to upgrade the T-Server.

Starting Version	Latest Version	CTI Link	Support (incl HA)	T-Servers Supported	Type of Support (TDM, IP, Hybrid)	Notes
<b>Alcatel OmniPCX Enterprise (OXE)/A4400</b>

## Switch Support

Starting Version	Latest Version	CTI Link	Support (incl HA)	T-Servers Supported	Type of Support (TDM, IP, Hybrid)	Notes
		(ASN.1)		HiPath 4000 CSTA III		are no longer certified separately. CAP is now considered an integral part of the switch.
V6 R2	V10	CSTA III (ASN.1)	8.1+	Siemens HiPath 4000 CSTA III	Hybrid	CAP versions are no longer certified separately. CAP is now considered an integral part of the switch.

## Discontinued Switch Support

The following switches are no longer supported. The table provides the switch name, the latest supported version, and the CTI Link.

Switch Name	Latest Version	CTI Link	Discontinued Date
Alcatel OmniPCX Office (OXO) / A4200	7.1	CSTA I	August 31, 2018
Aspect ACD	9.4	Data Interlink Version 8	August 31, 2018
EADS Telecom M6500/ Aastra Matra M6500 / NeXspan 50	R4.2	CSTA II E1N7+1	August 31, 2018
EADS Telecom Intecom M6880 PointSpan	5.5	PointSpan	August 31, 2018
Huawei NGN UAP8100	V300R002	CSTA II	December 31, 2016
Mitel Networks MN-3300	MCD 5.0	MiTAI 14.0.0.36 (SDK 5.0)	September 30, 2019
<b>NEC Small Hybrid</b>	R10/3500	OAI/ACD Rev IV	December 31, 2011
NEC Large Hybrid	R26/20	OAI/ACD Rev IV	December 31, 2011

Switch Name	Latest Version	CTI Link	Discontinued Date
<b>NEC SV7000</b>	SV 8500 S07	-	December 31, 2011
Nortel Communication Server 1000	7.6	Avaya Aura Contact Center 6.3 and 6.4 (AACC 6.3 and 6.4)	August 31, 2018
Siemens Hicom 300E (including family: 330E and 350E)	(900)6.6 (US)	CAP3.0 SMR 5+ CSTA I ASN.1	December 31, 2016
Siemens HiPath DX (formerly RealitisDX, formerly iSDX)	9	CallBridge DX 8.0.1 - iCCL	August 31, 2018
Spectrum	10.2	Transaction Link	August 31, 2018
Tadiran Telecom Coral Flexicom (formerly ECI Tel)	15.85	CSTA3 CLA v.8.02.04 - v.8.02.14	August 31, 2018

# Avaya Switch Support

Avaya Platform	Genesys Support	Notes
DEFINITY One	No	This has been replaced by the S8100.
G3 R	Yes	Multi-Vantage (MV) 1.3 is the last software version available for this switch. Communication Manager, which is available on other Avaya switches, is not available with the G3 R switch.
G3 CSI (Prologix)	Yes	Switch version 8 to 10.1 using ASAI versions 3 and 4.
G3 Si	Yes	
IP Office	No	This is an SMB offering.
IP600 Internet Protocol Communications Server	No	This has been replaced by the S8100.
Avaya Media Server (S8XXX series)	Yes	<p>The following CTI interfaces are supported:</p> <ul style="list-style-type: none"> <li>• MAPD</li> <li>• Co-Resident DLG</li> <li>• Application Enablement Services (AES), single and dual server configurations</li> </ul>
Avaya Enterprise Survivable Servers (ESS)	Yes	<p>For Avaya ESS support details, please refer to:</p> <ul style="list-style-type: none"> <li>• Framework 8.0 T-Server for Avaya Communication Manager Deployment Guide</li> <li>• Framework 8.0 T-Server for Avaya TSAPI Deployment Guide</li> </ul>

# Genesys Voice Platform 7.x Media Gateway Support

## Read This First

- Customers with large, high port density GVP 7.x servers, that are looking for transcoding capabilities should consider upgrading to the GVP 8.5 release. In addition to extensive product enhancements over the 7.x release, GVP 8.5 offers native Media Server Markup Language (MSML) support and numerous transcoding capabilities.

VoIP Gateway Vendors	Model	Version	GVP 7.6	Notes
Alcatel	5020	CSC 2.4.1 +	Yes	
Alcatel	5020	MSC	Yes	Alcatel 5020 MSC supported by GVP with SIP Server as front-end.
AudioCodes	Mediant 1000, 2000, 8000		Yes	Both GVP and SIP Server have been tested with the Siemens SIP HG3540 gateway but not together. Orders will be approved.
AudioCodes	TP260		Yes	
Cisco	54xx	IOS 12.3 (4+)	Yes	Cisco Media Gateways generally supported if IOS is 12.4 +
Cisco	53xx	IOS 12.3 (4+)	Yes	Cisco Media Gateways generally supported if IOS is 12.4 +
Cisco	3725, 3745	IOS 12.3 (3+)	Yes	Cisco Media Gateways generally supported if IOS is 12.4 +
Cisco	2821, 2851, 3845	IOS 12.4 (3+)	Yes	1. Cisco Media Gateways generally supported if IOS is 12.4

VoIP Gateway Vendors	Model	Version	GVP 7.6	Notes
				+ 2. Assumed no changes from 7.2.2. Potential GVP 7.6 field tests being considered..
Genesys	SIP Server	7.6	Yes	
OpenIN			Yes	OpenIN engagements require special architectural review and pre-testing validations in the field. All OpenIN deployments are Field Validations with GVP.
Siemens HiPath	4000		Yes	Both GVP and SIP Server have been tested with the Siemens SIP HG3540 gateway but not together. Orders will be approved.
Unify OSV (ex.Siemens HiPath)	8000		Yes	

# SIP and GVP Support Tables

## SIP-related Guidelines for Supported Media Interfaces

- Genesys Customer Care and product teams support integrations to the devices and SIP trunks listed in these tables. Expectations of this support are as follows:
  - Each integration has been successfully tested, either directly by Genesys or in cooperation with a partner.
  - Support focuses on the integration aspects including the SIP signaling and media (RTP) for typical/common deployment configurations.
  - Support typically extends across an entire product line which shares common software or firmware.
  - Support typically across a range of releases. For example, 4.x indicates that support is extended to any release that starts with the major version 4, such as 4.0.3, 4.1, and so on. This policy is based on practical experience of excellent backward compatibility by both Genesys and our partners.
  - Support is based on an end-to-end view of a deployment; Genesys requires that devices or trunks connected via an SBC must also be supported (the SBC does not provide complete isolation).
  - **Application notes** are posted for many of the integrations.
  - Genesys Customer Care will not troubleshoot 3rd party components; Genesys does work with SIP Select partners for joint troubleshooting.
  - Entries are typically removed from the SMI when a product or software version reaches End of Support.
  - Deployments with other SIP devices or trunks not listed in these tables require “field validation”. Consult with Product Management or On Demand Solutions for more information.
- Genesys recommends devices in our SIP Select program, which benefit from full-featured and thoroughly tested integrations plus joint troubleshooting with the Partners.

Refer to these topics for specifics:

- [Supported Soft Phones](#)
- [Supported Infrastructure](#)
- [Supported Trunks](#)

# Supported Hard Phones

## Important

Genesys does not perform certification testing for Yealink phones anymore; Customers and partners must undergo Professional Services (PS) field validation for the purpose.

For information on understanding this SIP-related information, support questions, and other guidelines, see [SIP-related Guidelines for Supported Media Interfaces](#).

Vendor	Phone Model	Firmware Version	SIP Server Versions	Feature Server Version	Recommended	Application Note	Notes

AT&T IP Transfer Connect	8.1.x, 8.0.x, 7.6.x	8.1.x	Sonus NBS (GSX & PSX) v7.3.5		Was tested with Sonus NBS GSX 7.3.5. & Sonus SBC v. 7.3.5, Interaction Workspace SIP endpoint 8.0.200.11.
British Telecom	8.1.x (tested with 8.1.0)	8.1.x (tested with 8.1.5)	Acme/AudioCodes Mediant		Was tested with Acme SBC and AudioCodes SBC 800
British Telecom Italy	8.1.x	9.0.x, 8.5.x	AudioCodes Mediant	<a href="#">BT Italy SIP Trunk Application note</a>	
CenturyLink	8.1.x	9.0.x, 8.5.x	AudioCodes Mediant	<a href="#">CenturyLink Application note</a>	
Colt	8.1.x	9.0.x, 8.5.x	AudioCodes Mediant	<a href="#">Colt Application Note</a>	Redirect with 3xx is not supported by Telenor ITSP. Supported by SBC. Inbound and outbound

					SIP digest authentication available only at SBC level.
ItaTel	8.1.x	9.0.x, 8.5.x	AudioCodes Mediant	ItaTel SIP Trunk Application Note	
Skype Connect	8.1.x	9.0.x, 8.5.x, 8.1.x	Any		Supported with any SBC
Telenor ITSP	8.1.x	9.0.x, 8.5.x	AudioCodes Mediant	Telenor ITSP Application Note	Redirect with 3xx is not fully supported by Telenor ITSP. Supported by SBC. Inbound and outbound SIP digest authentication available only at SBC level.
Verizon IPCC	7.6.x, 8.0.x, 8.1.x	8.1.x, Stream Manager 7.6.x	Acme		Was tested with Acme SBC
Windstream	8.1.x	9.0.x, 8.5.x	AudioCodesMediant	Windstream Application note	The Windstream ITSP does not support Early Media.

# UC Connector Support

Vendor/ Product	Product Versions	UC Connector Version(s)
Supported UC Environments		
Skype for Business	2015	8.0.3+
Microsoft Lync	2013	8.0.3+
Supported T-Servers		
Alcatel A4400/OXE	8.0+	8.0+
Avaya Communication Manager	8.0+	8.0+
Avaya TSAPI	8.0+	8.0+
Cisco UCM	7.5+	8.0+
Mitel MX-ONE	8.0+	8.0+
Genesys SIP Server	8.0.3+	8.0+
Nortel CS2000	8.0+	8.0+
Unify OS 4000 (ex.Siemens HiPath 4000 CSTA III)	8.0+	8.0+

## Supported Dialogic Boards

### Important

1. Dialogic® DM3 Media Boards are End of Life (EOL). Availability of Support is contingent upon a Support Plan being in place with Dialogic.
2. VTO reached EOL and End of Support (EOS) on August 28, 2015. Customers wanting to replace VTO functionality can choose from two Genesys offerings: SIP Qualification and Parking and/or Genesys Voice Platform. Please contact your account executive or sales person via the appropriate sales channels for additional information.

Dialogic Board	OC	VCB	VTO	GVP 8.x	Notes
D/120JCT-LS	EOL <sup>1</sup>	Yes	EOS	No	VCB is only supported by CPD Server 7.1.
D/160SC-LS	EOL <sup>1</sup>	Yes	EOS	No	Supported through O.C. 7.1, not supported with OC 7.2 (because not supported by SR 6.0 Intel Driver).  VCB is only supported by CPD Server 7.1.
D/41ESC-LS	EOL <sup>1</sup>	Yes	EOS	No	Supported through O.C. 7.1, not supported with OC 7.2 (because not supported by SR 6.0 Intel Driver).  VCB is only supported by CPD Server 7.1.
D/41EPCI	EOL <sup>1</sup>	Yes	EOS	No	Supported through O.C. 7.1, not supported with OC 7.2 (because not supported by SR 6.0 Intel Driver).  VCB is only supported by CPD Server 7.1.

Dialogic Board	OC	VCB	VTO	GVP 8.x	Notes

## Notes for Outbound Contact and Voice Callback Users

The **Supported Dialogic Boards** table indicates the Dialogic boards approved by Genesys for use with Outbound Contact (OC) and Voice Callback (VCB).

### Tip

Please contact Genesys Customer Care to confirm Dialogic board model support.

### Dialogic software support by OC and VCB

Support includes:

- SR 6.0 for the Springware boards
- SR 6.0 with GC for the DM3 (High Density) boards
- SR 6.0:
  - Outbound 8.0: Supported Service update # 239.
  - Outbound 8.1: Supported Service update # 258.
- Host Media Processing (HMP) 3.0:
- Outbound 8.0: Supported Service update # 253.
- Outbound 8.1: Supported Service update # 296.
- Outbound 8.1.2: Supported Service Update # 328+.

### Important

1. DM3 boards support by OC require installation of Global Call dlls.
2. Global Call dlls are available with installation of SR 6.0.
3. To utilize Global Call capability (supported by OC with DM3 boards only) you must

---

install the Global Call Package that includes Global Call protocols.

## Other Dialogic Boards

Other Dialogic boards that are not listed in [Supported Dialogic Boards table](#) can be used, provided that specific criteria for Dialogic board functionality are met, as follows:

- Mandatory
  - Telephony buses -CT bus
  - Network resources
- Optional
  - Voice resources

The absence of Voice resources leads to the following limitations:

- Post Call Progress Detection cannot be performed.
- Recorded announcements and forth tones cannot be supported.

CPD Server supports only the latest Intel drivers (Service Release 6) for Intel Dialogic boards. Consequently, Genesys no longer supports Dialogic hardware that is not supported by the Dialogic System Release 6.0, because this release does not support ISA and some other legacy boards.

The Service Release 6.0 supported hardware list is provided in the Dialogic® System Release 6.0 on PCI for Windows on Architecture Release Guide. The Release Guide is available at the following location:

<https://www.dialogic.com/manuals/sr/sr60winpci>

### Tip

For further information including: Dialogic boards that can be used for both OC and VCB, discontinued Dialogic boards, supported operating systems, and service updates, refer to the Dialogic web site at <http://www.dialogic.com/>.

## Notes for VTO Users

The [Supported Dialogic Boards](#) table indicates the Dialogic boards approved by Genesys for use with VTO.

## Other Dialogic Springware Boards

Other Dialogic Springware boards can be used with VTO in R4 call control mode, if the following criteria are met:

- Telephony buses—SC bus or CT bus
- Network resources
- Voice resources

## Other Dialogic Springware and NetStructure (DM3) TDM Boards

Other Dialogic Springware and NetStructure (DM3) TDM boards not listed in [Supported Dialogic Boards](#) table can be used with VTO in GlobalCall call control mode if they are supported by the Dialogic GlobalCall software layer.

VTO utilizes one network and one voice resource per channel. Therefore, the number of VTO channels is limited by the smaller number of voice and network resources available.

- VT Server 7.0.100 and earlier should be used with Dialogic System Release 5.1.1, Service Pack 1.
- For VT Server 7.0.101 the recommended version is Dialogic System Release 6.0.

## Dialogic System Software Installation Considerations

When installing the Dialogic System software for VTO:

- VTO in the GlobalCall call control mode: Select the option **GlobalCallAPI Package**.
- VTO in the R4 call control mode: You do not need to select the option **GlobalCall API Package**.
- Depending upon the Dialogic board model used and the telephony network protocol implemented by the switch's network interface card: the Global Call Protocols package (distributed separately by Dialogic), may be required.
- For each specific combination of the Dialogic board model and telephony network protocol, consult Dialogic documentation for the GlobalCall layer setup and configuration options.

# GVP & Nuance Compatibility

## Important

- Nuance products entered End of Life (EOL) on July 30 2024,
  - The following Nuance products reach End of Support on June 30, 2027:
    - Nuance Dialog Engine for IVR
    - Nuance Dragon Voice
  - All other Nuance products reach End of Support on June 30, 2028.

	GVP 7.6	GVP 8.1	GVP 8.1.5	GVP 8.5.x	GVP 9.x
<b>ASR</b>					
<b>Nuance Dragon Voice (Tier 5)</b> (Base software is packaged with Nuance Speech Suite 11.0.2; Voice Data Pack for Dragon Voice is shipped separately when ordered. Nuance Tier 4 licenses are a pre-requisite for ordering Dragon Voice. Also, see the *** note below.)					
Krypton recognition engine					3.2.0*
Natural Language Processing (NLP) service					1.0.2*
Nuance Resource Manager					1.0.1*

	<b>GVP 7.6</b>	<b>GVP 8.1</b>	<b>GVP 8.1.5</b>	<b>GVP 8.5.x</b>	<b>GVP 9.x</b>
Nuance Management Station					6.0.1*

<b>Nuance NDMs</b>					
Core	-	-	6.1	6.1	

	GVP 7.6	GVP 8.1	GVP 8.1.5	GVP 8.5.x	GVP 9.x
Name	-	-	6.1	6.1	
Spelling	-	-	6.1	6.1	
Email	-	-	6.1	6.1	
Address	-	-	6.1	6.1	

**\* The above Nuance versions are what were used during testing against a specific GVP release. However, the certified version and any later Service Pack are supported. For example, if Nuance Recognizer 10.2.x was certified against GVP 8.1.5, then Genesys also supports Nuance Recognizer 10.2.y on GVP 8.1.5 and higher.**

**\*\* Genesys announced the end of life (EOL) for these products on May 27, 2016. Please contact your Account Executive, Partner Manager, or the GVP Product Manager, for information about migration, entitlement, and/or product availability.**

**\*\*\* All Recognizer 10.x Languages are compatible with Recognizer 11 (Tiers 2 - 4), and Vocalizer 6 voices are compatible with Vocalizer 7; however, Speech Suite 11 requires a fresh installation and a new license file. For additional information about Nuance Speech Suite 11, please consult the Nuance Release Notes and Speech Suite documentation available with the Nuance software. For a replacement license files, please contact your Nuance support provider.**

## General Note

- The data in the above table was consolidated to the major releases of GVP, showing differences in the minor releases of GVP only whenever there are changes with the validation of the underlying supported Nuance products.
