T-Server for CSTA Connector Deployment Guide

security Section

security Section

The `security` section contains configuration options used to specify security elements for your system. In addition to other options that may be required by your application, this section contains the configuration option `disable-rbac`, which is used to enable or disable Role-Based Access Control for an application. Refer to the *Role-Based Access Control* chapter in the *Genesys 8.0 Security Deployment Guide* for complete information about this option.
