### About Genesys

Genesys is the world's leading provider of customer service and contact center software - with more than 4,000 customers in 80 countries. Drawing on its more than 20 years of customer service innovation and experience, Genesys is uniquely positioned to help companies bring their people, insights and customer channels together to effectively drive today's customer conversation. Genesys software directs more than 100 million interactions every day, maximizing the value of customer engagement and differentiating the experience by driving personalization and multi-channel customer service - and extending customer service across the enterprise to optimize processes and the performance of customer-facing employees. Go to [www.genesys.com](http://www.genesys.com) for more information.

Each product has its own documentation for online viewing at the Genesys Documentation website or on the Documentation Library DVD, which is available from Genesys upon request. For more information, contact your sales representative.

### Notice

Although reasonable effort is made to ensure that the information in this document is complete and accurate at the time of release, Genesys Telecommunications Laboratories, Inc. cannot assume responsibility for any existing errors. Changes and/or corrections to the information contained in this document may be incorporated in future versions.

### You are Responsible for Your System's Security

You are responsible for the security of your system. Product administration to prevent unauthorized use is your responsibility. Your system administrator should read all documents provided with this product to fully understand the features available that reduce your risk of incurring charges for unlicensed use of Genesys products.

### Trademarks

Genesys, the Genesys logo, VoiceGenie, and T-Server are registered trademarks of Genesys Telecommunications Laboratories, Inc. ## **Overview**

This document contains the following:

- [Product Version Identification for the updated hot fix](#)
- [Hot-Fix Installation Instructions](#)
- [Fixes](#)

Please refer to the 7.2.100 GA version of the release notes for the following information which has not changed:

- [Resources](#)
- [Where to Get Help](#)
- [Terminology](#)
- [Product Version Identification](#)
- [Features](#)
- [Known Limitations](#)

## Product Version Identification

<b>Product Name</b>	VoiceGenie OA&M Framework
<b>Version</b>	7.2.1 HF 39
<b>Release Date</b>	September 2014

OA&M Framework Information	
<b>Package</b>	cmp-proxy-7.2.1-RHEL4_HF39.tar.gz
<b>Operating System</b>	Red Hat Enterprise Linux 4.0 Update 6

## Installing / Configuring VoiceGenie Hot Fix

1. Upload the hot fix cmp-proxy-7.2.1-RHEL4\_HF39.tar.gz using the product manager in the SMC console.
2. Deploy the existing OAM Framework CMP Proxy profile using the Deployment manager. CMP Proxy will be restarted automatically once the deployment is done. **Note:** if any customer log sinks are located in /usr/local/cmp-proxy directory, which is a linked directory, they need to be copied to the new linked directory.
3. Use the following CLC command to update the cmp-proxy.xml:

```
CLC> cfgxmladd cmpproxy "RHEL4" 7.2.1 /usr/local/cmp-proxy/config/cmp-proxy.xml
```

4. Stop CMP Proxy.
5. Restart CMP Sever.
6. Start CMP Proxy.
7. Search cmp.drop\_log\_upon\_full\_queue in /usr/local/cmp-proxy/config/cmp-proxy.xml. If it is not found, repeat 2-6 until it is.
8. Set the new parameter cmp.drop\_log\_upon\_full\_queue to "Drop Logs" and make a change to any other parameter, such as cmp.trace\_flag. Note: it is important to make a change to an existing parameter when first time setting a new introduced parameter.
9. Restart CMP Proxy.
10. Make sure the parameter cmp.drop\_log\_upon\_full\_queue is set correctly. And then roll back the other parameter changed in step 6.
11. Restart CMP Proxy.

## Fixes

The following issues have been addressed in this release:

ER #	Summary
VG-3325	SendQueue TimeLimit Reached

- Introduced a parameter called `cmp.drop_log_upon_full_queue` to determine whether to drop logs, or wait for the queue size to drop after the queue is full.
- Introduced a parameter called `cmp.sink_delay_note_threshold` to specify the threshold of sink delay that needs to send a note to syslog.
