## About This Software

Multimedia is a set of capabilities for the Customer Interaction Management (CIM) Platform. These capabilities enable customers to use graphical user interfaces to implement business process requirements for managing real-time events and processing events over time. As an architecture for non-voice media, the Multimedia capabilities provide a common processing layer for creating event-driven relationships across CIM Platform media options such as Genesys E-mail, Web Media, and Open Media.

This CD contains Genesys Web Collaboration, a separately-packaged option for the CIM Platform.

Web Collaboration enables agents and customers to view and navigate web pages together while on a voice or chat interaction. This enables agents to provide superior customer service by assisting customers in using capabilities of web sites such as making purchases, completing forms, finding information, and so on.

Genesys Web Collaboration must be deployed in conjunction with Genesys Interaction Management, which delivers the core capabilities of Multimedia.

## New Features

Web Collaboration 7.6.1 contains the following new features:

- Internet Explorer 7 support.
- Red Hat Enterprise Linux 4 support.
- Microsoft SQL Server 2005 support.

Web Collaboration 7.6.0 contains no new features.
